	Examiner	Art Unit
	Karen B Addison	2834

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

THE REPLY FILED 18 August 2003 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.

PERIOD FOR REPLY [check either a) or b)]

a) The period for reply expires 4 months from the mailing date of the final rejection.
 b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.
 ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. A Notice of Appeal was filed on _____. Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.
 2. The proposed amendment(s) will not be entered because:
 (a) they raise new issues that would require further consideration and/or search (see NOTE below);
 (b) they raise the issue of new matter (see Note below);
 (c) they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
 (d) they present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: _____.

3. Applicant's reply has overcome the following rejection(s): _____.
 4. Newly proposed or amended claim(s) ____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
 5. The a) affidavit, b) exhibit, or c) request for reconsideration has been considered but does NOT place the application in condition for allowance because: See Continuation Sheet.
 6. The affidavit or exhibit will NOT be considered because it is not directed SOLELY to issues which were newly raised by the Examiner in the final rejection.
 7. For purposes of Appeal, the proposed amendment(s) a) will not be entered or b) will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.

The status of the claim(s) is (or will be) as follows:

Claim(s) allowed: _____.

Claim(s) objected to: _____.

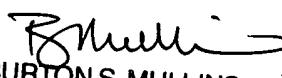

Claim(s) rejected: 1-11, 16-25.

Claim(s) withdrawn from consideration: 12-15.

8. The drawing correction filed on ____ is a) approved or b) disapproved by the Examiner.

9. Note the attached Information Disclosure Statement(s) (PTO-1449) Paper No(s). _____.

10. Other: _____.

 BURTON S. MULLINS
 PRIMARY EXAMINER

Continuation of 5. does NOT place the application in condition for allowance because: Horski in view of Hull discloses the claim invention as disclosed in the final office action issued on 6/3/03. Horski shows a motor in fig.1-5 comprising: a stator body having a solid core {(38)line 3 line 2-3} formed of a first material made of powder metal / plastic with a plurality of circumferentially spaced portions (40) having a second material consisting of plastic at an outer peripheral surfaces, and a conductive material is deposited between the teeth over the insulating layer that's more conductive than the first material. Wherein, the insulating material (plastic) is placed around the circumferentially spaced teeth, and a conductive material deposited between the teeth. Horski also discloses a rotor (52) cooperating to drive an output- shaft (58) a frame (12) that can be used in an automobile and Hull teaches vehicle component fig.1 comprising: an electric motor (12) having a vehicle component (10) movable between a plurality of operational positions relative to a fixed component (12) driving by an AC motor wherein the output shaft (14) is coupled to the vehicle component between the operation position between the stator (12.1) and rotor (12.2) cooperating to drive the motor of the output shaft (14) with a gear assembly (18) coupled to the closer member (window see col.1 line 1-2) fixed to a frame for the purpose of driving the closer member.

A typographical error was made on page 3 line 1 of the final office action issued on 6/3/03. The line should read "Claims 6-25 are rejected under 35U.S.C. 103(a) as being unpatentable over Horski in view of Hull (6025663).

Although a typographical error was made, the claim feature of claim 6(Ac power motor) was addressed in the body of the office action. .
